Dear Parents and Carers

Re: Year 8 Science Assessment

I am writing to provide details of the End of Year Science Assessment which will take place at the start of term 6, in the week beginning 2 June.

The assessment will cover only the topics taught during science lessons this academic year, including scientific concepts and science investigation skills. Students will complete the test in their science lesson under full examination conditions.

To help students prepare for this examination, we have provided a revision table, which includes the main topic areas from Year 8. To support additional revision at home, we will introduce students to a variety of revision techniques. The revision strategies that students develop now will be equally useful in Years 9, 10 and 11 and I would encourage them to engage fully with this process.

The revision schedule page numbers refer to the CGP revision guide: we currently have copies in stock, which are available for £3.25. Payment can be made via the school's online payment system and they will then be delivered to students during their science lessons. We will also show students how to access additional revision resources (including practice exam questions) stored on the school system and accessible from home. BBC Bitesize, Cognito and Seneca Learning are also useful revision aids with dedicated KS3 resources.

If you have any questions regarding the science courses, please do not hesitate to contact me.

Yours sincerely

J Goode
KS3 Science Co-ordinator
